### **Logistics Support**

Wouldn't it be nice if Logistics were logical?

In a work environment growing increasingly complex, the strain of sourcing and managing critical logistical elements for your operations grows. From materials management to large-scale re-locations, NHouse Design & Technology (NHDT) removes the risk from logistics management with effective solutions that adapt to your needs, regardless of their size or complexity.

#### *Materials Management*

Through innovative approaches and long-standing relationships with industry-recognized manufacturers, NHDT provides full life-cycle material acquisition services. We use risk-based supply chain management to identify and mitigate the risks to mission, schedule, and budget through the entire procurement, warehousing, and delivery phases.

#### *Relocation Management*

NHDT merges talented personnel with enterprising solutions to provide comprehensive management and planning for your relocation efforts. We retain a professional logistics support staff with interstate licensed trucks and equipment. Through our partner staffing centers, we can tap extensive surge capabilities to meet your changing needs. From transition planning to surplus remediation and libraries to laboratories, NHDT Consulting moves with you every step of the way, managing risks both seen and unforeseen.

There is an element of risk in every business venture. Control it with NHDT.

### **Risk Management Services**

Take control of the risks in your business.

Unforeseen risks are a challenge for any enterprise. NHouse Design & Technology (NHDT) systematically gathers and analyzes information, so you're well equipped to make the critical decisions that protect and streamline your enterprise. With over 12 years of experience, we'll help you understand and manage risks across a global landscape rife with political, social, economic, and technological hurdles. NHDT' business solutions deftly fortify core operations to succeed in the face of business interruptions. By developing innovative ideas and technologies, we mitigate risks for governments and businesses worldwide, so they can continue to excel.

NHDT applies dynamic cutting-edge thinking to efficient program and project risk-based planning. Our modular, impact-centered solutions are based on Enterprise Resilience Management (ERM). We offer strategic and tactical recommendations at a competitive rate.

Rely on us for a comprehensive evaluation of all aspects of your enterprise. From categorizing assets to understanding the information and processes that move your business forward, we'll help you identify risks and proactively diffuse them.

There is an element of risk in every business venture. Control it with NHDT.

### **Project Management**

Don't let the Project Management tightrope throw you off.

Competing priorities, increasing demands, constrained resources, and personality management - just a few of the challenges facing today's project managers. With collaboration requirements on the rise,

efficiency and cost control under the microscope, and fewer qualified resources available, today's projects are more complex and over-arching than ever, making effective project management a crucial element of every project.

NHouse Design & Technology (NHDT) is a one-stop-shop for all your project management needs. With expertise ranging from information technology to construction management, to structured cabling and logistical services, NHDT can ease the burden of managing large, complex projects and mitigate unforeseen risks in the process.

As the leader of a team of trusted partners, NHDT delivers best-of-breed solutions to support full business life-cycle management. We combine our risk-based management approach and innovative technologies with the breadth and depth of qualified, industry-recognized service providers to deliver true turnkey solutions for any project, scalable to any size and complexity.

There is an element of risk in every business venture. Control it with NHDT.

  - Earned Value Management System (EVMS)

### **Program Management**

Are you managing your program, or is it managing you?

Now more than ever, it's crucial to effectively manage your programs. Complex missions, constrained resources, and stringent execution schedules have made strong program management practices critical for survival in these turbulent times. Gone are the days when success was measured primarily by simple parameters like meeting schedules, costs, and budgets. Today's programs are much more qualitative - measured by innovative approaches and solutions, gained efficiencies, saved dollars, customer satisfaction, and positive public relations - especially for high-profile programs.

NHouse Design & Technology (NHDT) takes a comprehensive, risk-based approach towards program management. We go far deeper than the standard vulnerability assessments to accurately gauge the threats, vulnerabilities, and impacts that affect both tangible and non-tangible program assets; then we determine and prioritize the risks to the entire program. NHDT helps today's program managers make smart risk-based decisions and investments, ensuring that valuable resources are deployed where they're needed most.
